

### State Route 70 Passing Lanes Desoto County, Florida

**Project Title:** Design-Build of State Road 70 Passing Lanes  
**Project Number:** E1F77  
**Customer:** Florida Department of Transportation  
**Dollar Amount:** \$4,545,295.00  
**Percent Complete:** 100%  
**Completion:** September 9, 2008  
**Role:** Prime Contractor

#### Project Scope:

This project involved the design-build procurement process to improve traffic flow on SR70 by construction of four segments totaling 7 miles of passing lanes (two eastbound segments and two westbound segments). QE and its design partner were responsible for all permitting and construction of this project. The project included the widening of the existing roadway, placement of embankment, lime rock placement, asphalt placement and creation of stormwater detention ponds. All work was self performed by QE except for line striping.
